The Lucent modular showcase system is comprised of glass or painted panels fixed to a structural aluminium frame with flush face-mounted stainless steel fittings thus creating a simple, elegant glass display case with unbroken lines throughout. Lucent is available as a glass all round showcase, or a combination of glass and structural E0MDF or Ply painted panels to your specification with removable dress panels as required.

Lucent is a fully modular showcase which can be built to your specific size and shape requirements. There are no standard sizes and a suite of single or 2 door showcases can be easily reconfigured and reassembled to make larger showcase arrangements.

The Lucent showcase offers hinged door access to the display area using the 'Micro-Master' hinge system, for which Designcraft are the Australian distributor, or fully removable door panels for smaller cases. This high capacity hinging system allows us to build showcases with large single doors for an uninterrupted view of collection objects.

There is no adhesive bonding of glass or panels and the assembled case is sealed by a high quality, neutral cure silicone seal. Back-painted or filmed glass to your colour specifications at top and bottom of the case hides the internal structural framing. The top frame of the showcase incorporates a lighting hood and a hanging track for glass shelves or object supports.

Since Lucent is fully demountable, a suite of Lucent showcases can be reconfigured to adapt to changing demands, offering an extremely versatile showcase system that's easy to install and which lends itself to travelling exhibitions and gallery spaces with frequently changing displays.

The Lucent display system is an attractive and cost effective solution for the long term display of valuable or significant collections and artefacts in a manner appropriate to Gallery and Museum aesthetic and performance requirements. The Lucent modular showcase system is 100% designed and manufactured in Australia.

high performing, cost effective and fully demountable
